Leica Rugby 320 SG & 410/420 DG

When accuracy is the goal, Leica Rugby makes the grade

Making the grade is what the Leica Rugby is all about. Whether your work requires level, single or dual grades and high accuracy over a long distance range, the Leica Rugby's extensive features will ensure both material and labour savings, keeping you on target to increase your bottom line.

The Leica Rugby Grade Lasers are automatic and self-levelling for jobs of any size, large or small. They can be used for any application involving precise grade control such as:

- n Building pads, parking lots and runways
- n Precise depth control for sub-base and fine grade excavation
- n Agricultural applications such as land leveling or tiling
- n Concrete forming and framework
- n Retention ponds and batters
- n Setting foundations and footings
- n Absolute compatibility with the widest range of machine control solutions

Why Leica Rugby is the toughest player on the field:

- n Waterproof and dustproof to work reliably in all weather and job site conditions
- n High-impact composite housing with protective rubber overmolding
- n Cast aluminum base withstands rough handling and creates a stable platform
- n Enclosed head for maximum internal component protection
- n Long-range two-way remote control, optional with the Leica Rugby 400 Series
- n Superior battery concept (alkaline or NiMH rechargeable)

- n Control all Rugby functions
- n Change settings "on-the-fly"
- n Large display with backlight
- n Water, dust and shockproof
- n Superior radio performance
- n Simplify workflow and reduce costs

Remote Control Specifications	
Instrument	Leica Rugby 410/420 DG
Distance	225 m typical
Battery Type	four AAA alkaline
Size (HxWxD)	155 x 70 x 45 mm
Weight	410 g

Reliable in General Construction

The Leica Rugby 320 SG/410 DG is perfect for general construction work

- n Easy foundation setting thanks to the 5-button keypad
- n Superior power management for working without interruptions (up to 130 hours)
- n Full-function long-range two way remote control saves time and reduces communication errors from inside or outside the cab of the machine (Leica Rugby 410/420 DG only)
- n High-power laser beam provides enhanced distance performance
- n Rugged and reliable, works when you need it

Tough in Machine Control

In the development of the Leica Rugby 320 SG and 410/420 DG models care was taken to ensure absolute compatibility with the widest range of machine control solutions. Your dealer will be pleased to advise you further.

Highest Accuracy in Agriculture

The Leica Rugby 420 DG is perfectly suited for the agriculture market, where accuracy over a long range is required.

- Designed for agriculture applications, such as land leveling and tiling
- Highest accuracy over long distances
- Align the laser with a simple one-person operation using the manual-axis-alignment feature
- Eliminate communication errors using the long-range remote control
- Stable laser plane over the whole temperature range
- High performance for all day use

User-friendly features give you the competitive edge for precise grade control

Leica Rugby Series Specifications	Leica Rugby 320 SG	Leica Rugby 410 DG	Leica Rugby 420 DG
Operating Range (Diameter)	900 m *	800 m *	1100 m *
Self-Leveling Accuracy	± 1.6 mm per 30 m **		
Self-Leveling Range	± 5 °		
Grade Capability	- 5 to + 25 %	- 5 to + 25 % in either axis (- 5 to + 15 % in both axes)	- 5 to + 25 % in either axis (- 5 to + 15 % in both axes)
Grade Resolution	0.001 %		
Rotating Speeds	5, 10, 15, 20 RPS		
Laser Diode	635 nm visible red laser	780 nm invisible (IR)	635 nm visible red laser
Size (H x W x D)	265 x 260 x 200 mm		
Weight	5 kg without batteries		
Operating Temperature	- 20 ° to + 50 ° C		
Battery Type	alkaline or NiMH		
Battery Life	up to 130 hours with alkaline; up to 100 hours with rechargeable ***		
Environmental	watertight to IPX-7 standard		
Warranty	2 years factory warranty / additional 3 years on request		

*Tested with Leica receivers (CAB Sensor, MLS700, Rod-Eye Digital/Plus) / **Accuracy is defined at +25°C / ***Battery life is dependent upon environmental conditions

Whether you have to precisely lay out a construction site, perform control measurements, collect height and angle data, align concrete forms, install ceilings and partitions, lay gravity flow pipe, locate underground services or complete site preparation and earthworks – Leica Geosystems offers the right instrument, construction laser or machine control installation specifically designed for your construction application.

Easy-to-use, jobsite-tough, accurate and reliable – Leica Geosystems instruments and lasers ensure the efficient use of your materials and resources. High-quality products, such as optical and electronic levels, construction lasers, total stations and machine automation systems, provide fast results, keep you working and increase your profitability.

When it has to be right.
